Comments
Tried JSP pages, but sessions and finally block are not handled. Keep up the good work
Good UI presentation, Good technical knowledge, Used Bootstrap, Covered most of the validations cases from User
Good Technical knowledge and attitude, keep up the good work
Needs to brush up on Servlets and JSP, overall good and very good attitude.
Need to try the project as web application, need to focus on database schema creation and need to raise questions
Good technincal knowledge.
Auto inc missing, Validation not handled properly,improper use of Try Catch - finally missing, Java - Ok
Need to try the project as web application, need to focus on database schema creation and need to raise questions
Good Attitude. Technically Strong. Project is fully completed in Java. JSP's and servlets not done so needs to brush u
Confident, good coding standards and good knowledge on core java
Need to try the project as web application, need to focus on database schema creation and need to raise questions
Having fair knowledge in servlets/jsp. Need to brush up more java concepts.
Confident and Good attempt on Servlet and JSP
Commendable knowledge technically, few coding standards needs to be looked into
Missing proper validation, satisfied with technical knowledge,
Confident, good coding standards,Need to improve on the basics of core java
Average technical knowledge, needs to brush up on topics not strong in
Technically Good. Project is not fully completed.
Need to work on some validations. Technically good.
Good attitude, nice attempt, average tech knowledge
Need to improve technically. Good Attitude. Confident and good attempt on Servlet and JSP. Coding Standards Not f
Good Attitude. Good Java Knolwedge. Project has some technical errors.
Good Attitude.Tried UI but need to concentrate on validations.
didn't finish the project completely, like validations did not cover all scenario's. Average performer, has very good sc
Nice Attitude. Project is partially Complete, validations not done. Good Java Knowledge but not confident about ans
Average technical knowledge, needs to brush up on topics not strong in
improper validation,needs to brush up on HTML & JavaScript.
No improvement on the project from last time, needs to show improvement in future
Needs to improve technically, below average.
Implemented the code without understanding and not confident
Not technically strong, needs to improve
Project is not completed in Java. Need to improve technically.
Not good in basics of Java. She is not able to explain few code snippets what she has written.Suggestions given in the
Unable to answer most of the java questions. Need improvement.
Definitions are told with no proper knowledge. Not good in basics of java.
Logical Error, Not implemented as listed in Case study, Low technical knowledge.
Coding standards not followed. Unable to answer simple java questions. Suggestions given in the previous assessme

perspective, has worked on the review comments mentioned before.
